### DETAILED ACTION

Claims 10-14 are currently pending.

#### Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10,11 drawn to method for inhibiting adhesion using contortrostatin, classified in class 514, subclass 12.
- II. Claims 12-14 drawn to disintegrin polypeptide, classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated as product of Group II is not the same product being used in method of Group I. Even if the product of Group II was read as contortrostatin addressed in Group I, the groups would be considered patentably distinct as the product of Group II can be used in other, unrelated methods, such as rising antibodies or peptide synthesis.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
